# Welcome to Raya Brand Guidelines.

## *Introduction*

These guidelines will instruct you on how to use our brand identity effectively, to make all brand communications look and sound their best.

This document will take you through 5 chapters: Strategy, story, tone of voice, visual language, brand architecture, applications; which come together to make the 'Raya' brand stronger and more consistent.

## *Chapter 01 / About the brand*

### **01 The Story**

The name "Raya" reflects a significant meaning tied to its origins and aspirations. "Raya" in Arabic means "flag" symbolizing leadership, prominence, and a guiding force.

Raya Holding for Financial Investments, the name conveys commitment to leading in its sector, setting high standards, and guiding its stakeholders towards success and growth. It reflects the company's vision to stand out as a prominent player in the financial and investment landscape, embodying strength, vision, and strategic direction.

*Chapter 01 / About the brand*

## 02 The Platform and Strategy

Repositioning Raya Holding  
as a strategic investor;  
focusing on sustainable  
growth, value-creation,  
innovation and impact, by  
using a verbal and visual  
symbol of successful  
navigation.

*Volume 01 / July 2024.*

## *Chapter 02 / Logo (Offline)*

### 01 Overview

A “wordmark” is used in the ‘Raya’ logo. It is not a font, but rather a specially designed piece of artwork. The foundation of ‘Raya’ word mark is a bold typeface which has been modified, to make it more unique with the inclusion of the positive and negative ‘Y’ resulting in more personality and ownership.

Our logo is a very valuable asset. We must treat it nicely and never abuse it.

In all applications, the logo should be reproduced at a size that maintains the integrity of the mark and yields clean and legible lettering and art detail.

*Chapter 02 /  
Logo (Offline)*

**02 Logo Colors**

Next to the logo, the typeface, the name or the claim, colour is important to the brand recognition and is a brand image element to be considered.

Basically, colour can help send out a message about the brand, or make it easier to remember, or to associate with. It can be used to evoke emotion and build that all-important connection with the people who surround your brand.

These are the accepted color combinations for the logo, in terms of background and foreground colors.

## *Chapter 02 / Logo (Offline)*

### 02 Logo Colors - gradients and images.

Next to the logo, the typeface, the name or the claim, colour is important to the brand recognition and is a brand image element to be considered.

Basically, colour can help send out a message about the brand, or make it easier to remember, or to associate with. It can be used to evoke emotion and build that all-important connection with the people who surround your brand.

These are the accepted color combinations for the logo, in terms of background and foreground colors.

*Centralized bottom*

## *Chapter 02 / Logo (Offline)*

### **03 Logo Placement**

The main standard position for the logo is top left aligned.

The clear space of the logo is used for the space to the edge of the page.

## 05 Clear Space and minimum size

Clear space around the logo is at least 1x. Minimum clear space ensures there is no interference with other elements. This distance should be fixed within all borders or co-branding.

The 'x' is to be used as a protection area all around the logo, whenever the size of the logo is defined, the 'x' is to be extracted and used in ratio as a measurement tool for the protection area.

Minimum size is based on the legibility of the logo when printed or reproduced in any application it should look clear and be readable.

## 06 Holding Co-Branding

Sometimes, we may need to lockup our logo with another business or partner. The letter 'A' from the logo should always be used as a ruler to measure the distance between our logo and the other logo we are co-branded with.

8.4 px

18.8 px

## Chapter 02 / Logo (Offline)

### 06 Logo layout margins

Our Margin formula for any layout used is

#### **Longest / 25 = Margin**

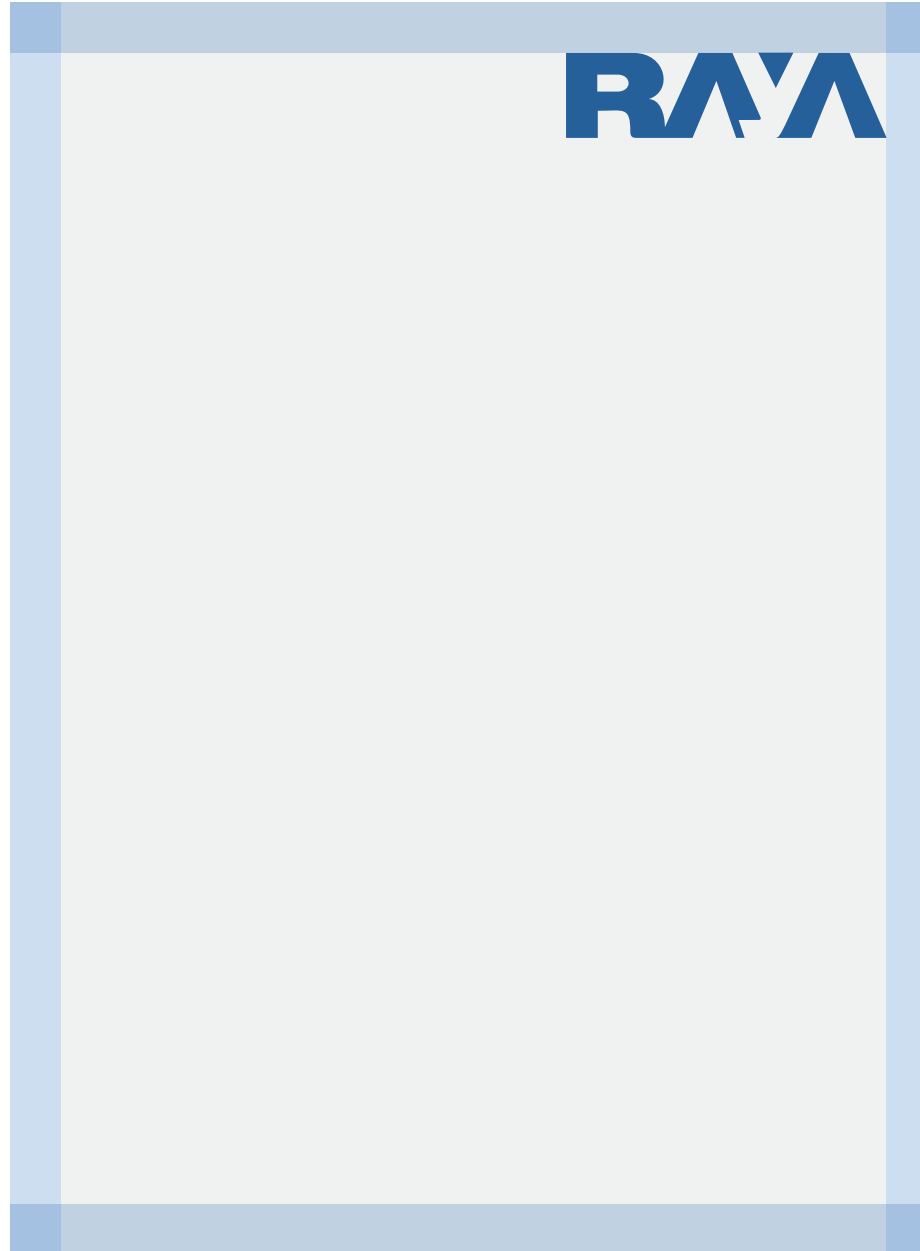

To create our margins, we take the longest side of the application and divide by 25. This gives us a modular margin that scales proportionately across all application formats and sizes.

Note: In some extreme cases (very wide or very tall) applications, your margins may need to be adjusted manually for optical correctness.

8.4 px

18.8 px

Chapter 02 /  
Logo (Offline)

## 06 Logo within margins

Our logo is generally applied at the edges of the layout, please refer to logo placement section.

**The height of the logo should be 1.7x the margin size.** This ensures our logo scales proportionally with each application. For billboard use, the logo size can be increased for visibility at the discretion at the designer, using this page as an optical reference.

*Do not enlarge the size of the triangle.*

*Do not tilt or shear the logo.*

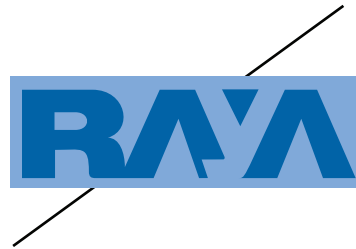

*Do not use any color not specified in the allowed colors.*

*Do not add any drop shadows to the logo.*

*Do not frame or box the logo.*

*Do not stretch upwards.*

*Do not stretch inwards.*

*Do not stroke the logo.*

## Chapter 03 / Logo (Offline)

### 07 Misuses

Our logo should always be seen clearly and dramatically.

When using the logo on imagery, always make sure that it is positioned away from any competing imagery and stands out from the background color.

As seen across are all examples for misuses and unacceptable logo usages.

## Chapter 03 / Brand Architecture

### 02 Sub-brands (Online) Concept

Flag semaphore is a signaling system that uses flags, typically held in each hand, to convey information over a distance through visual signals.

The flag is subtly integrated within our typographic logo and has been appreciated solely as a symbol of our concept, 'The Flag.'

An alphabet system has been developed to enable the brand to expand its use of design elements and graphic shapes, ensuring that these elements retain their purpose and meaning.

## Chapter 04 / Visual Language

### 01 Color Palette

Our main set of colors are a handful of blues and a shade of grey, a deep beautiful Navy. These colors are used on all pieces of 'Raya' communication in one form or another.

Our secondary colors are to be used on our website, in presentations and in illustration. They can help differentiate between demographics, highlight key information and add another level of energy to the 'Raya' brand. These colors should be used sparingly, never as main floods of backgrounds or typography. They are meant to help empower our primary set of colors.

## 01 Color Palette - Monotone Sample

Here is an example of how our primary colors can all be used together giving a mono-tone effect to visuals.

Also another example of how our secondary colors kick in with the primary colors and the distribution of importance accordingly. .

**02 Typography - Headline Font**

JetBrains Mono's typeface forms are simple and free from unnecessary details. Rendered in small sizes, the text looks crisper.

The easier the forms, the faster the eye perceives them and the less effort the brain needs to process them. The typeface has 8 different weights and they are all allowed to be used in upper and lower cases depending on the need. JetBrains is only to be used for headlines, big text and digits. Please do not over-use it.

Inter® is a variable font family carefully crafted & designed for computer screens. Inter® features a tall x-height to aid in readability of mixed-case and lower-case text.

It is available in 9 different weights to allow flexibility and maintain consistency. It is a standalone and modern, whilst communicating with confidence, it is clear and has the stopping power at larger sizes whilst retaining clarity and focus at smaller sizes.

Inter® should be used predominantly on all English communication.

Chapter 04 / Visual Language

02 Typography - Arabic Font

29LT Baseet is a present-day simplified typeface drawn with extreme refinement. Its mono-linear structure unveils causality within a relaxed atmosphere. The font's name suits well its main characteristic, as it embodies simplicity. It features a blend of straight vertical, horizontal, and diagonal letter structures fused in-between curved smooth corners and sharp edges, giving the typeface a dynamic trait and an energetic feel. Besides, its round terminals and monospaced Latin letters lend the font a friendly vibe.

It works greatly and perfectly with JetBrains and Inter when needed in any bilingual forms.

### 03 Illustration Style / Sample

Using our color palette, our brand illustrations are a visualization to actions reflecting different activities practiced at 'Raya' in a 2D manner to capture a certain moment during a certain movement.

This illustrative style can be used to showcase our brand's diversity, strengths and offerings, or as design elements, which allow for broader communications and interpretation.

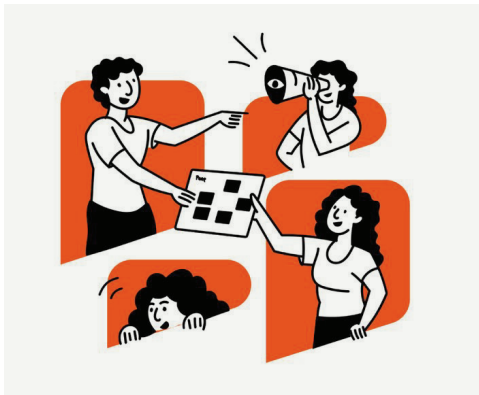

To aid the brand with a variety of shapes utilizing our colors, our edges and showing off a friendly unique tonality.

### 03 Illustration Style / Don't's Sample

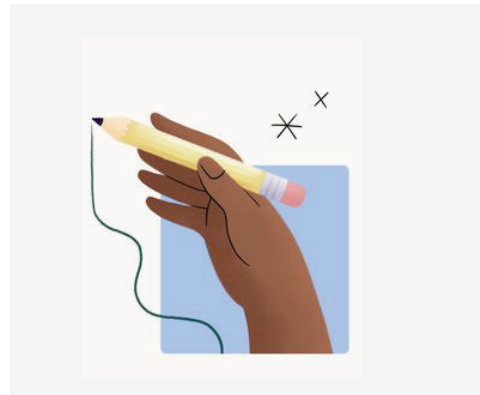

This illustration style is simple with no shadows, borders, strokes, lines or facial details. It is easy to use and easy to customize and build for each sector of Raya.

Find below samples for the illustration style to avoid and is considered irrelevant to Raya.

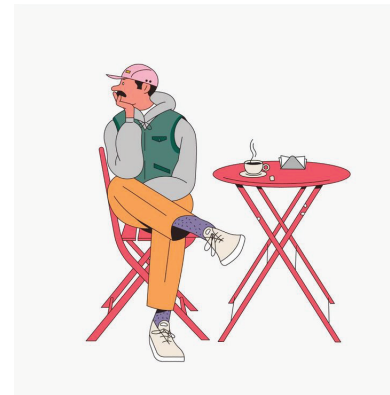

✗ Irrelevant style, Black and white with facial details and lines.

✗ Style uses shadows, gradients and irrelevant lines and details.

✗ Style uses lines, too many colors and facial features with realistic lines.

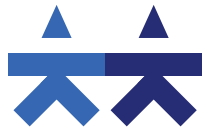

04 Iconography Style/

**05 Holding Pattern Design 02**

Using the cubic forms and the flag form an iconic pattern design was born to be uniquely used by 'Raya' on diverse mediums.

## Chapter 04 / Visual Language

### 06 Imagery Style / People

Our goal is to improve the quality of the message communicated through 'Raya's imagery.

Our imagery style should always include people relevant to our community and culture. Preferably captured images should be during an action within the appropriate environment and with comfortable faces and visible lighting.

We should always show both men and woman and cover all our age groups captured in the action/change relevant to our field.

## Chapter 04 / Visual Language

### 06 Imagery Style / Places

Our goal is to improvise on our diverse projects and vast scales which reflects the heritage, strength and growth of our business.

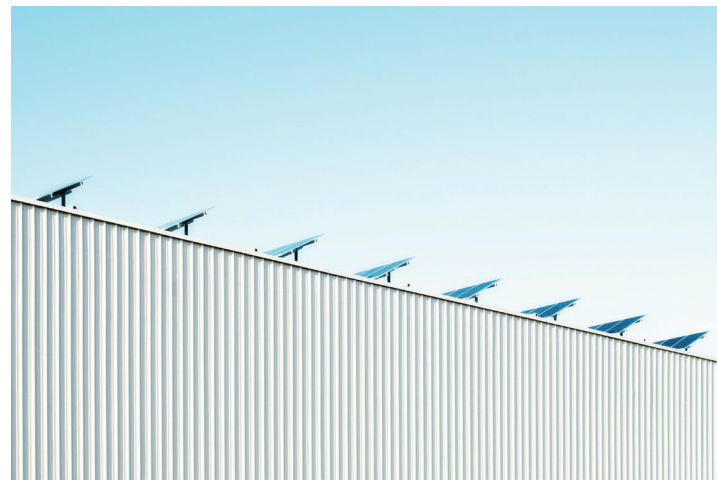

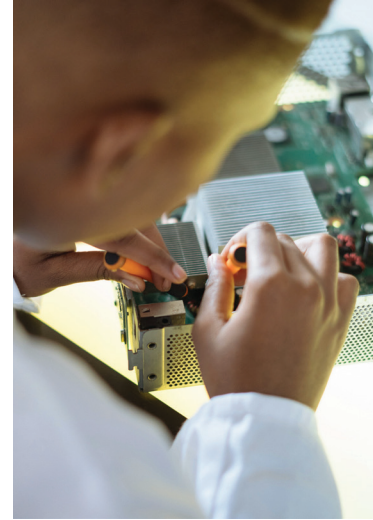

Our images should always clearly show relevance and glimpses from the business with focus on size and scale.

## Chapter 04/ Visual Language

### 06 Imagery Style / Things

When taking images of objects, items or things, it should always be clear in relevant environments and hopeful color palette to reflect the mission of 'Raya'.

06 Imagery Style Dots /  
People & Culture

Our goal is to improve the quality of the message communicated through 'Raya's imagery.

Our imagery style should always include people relevant to our community and culture. Preferably captured images should be during an action within the appropriate environment and with comfortable faces and visible lighting.

We should always show both men and woman and cover all our age groups captured in the action/change relevant to our field.

✗ Irrelevant ethnicity

✗ Too branded

✗ No Background.

✗ Looking to the camera + irrelevant clothing

✗ Irrelevant style

## 06 Imagery Style Dents / Places

When displaying images of things or places, we should always show scale and relevance in environment, ethnicity and business with 50/50 ratios, content to background or foreground to background. Never zoomed in, never small scale, and never irrelevant unclear imagery.

✗ Image has no focal point, aimless

✗ Not showing scale + unclear product

✗ Dull lighting + irrelevant colors

✗ Unattractive lighting + ratios

✗ Dull colors + environment
